FIT FOR SCIENCE

***BRINGING QUALITY & EFFICIENCY TO RESEARCH***

***BRINGING QUALITY & EFFICIENCY TO RESEARCH***

## Leading The Way in Research & IVD

**BIOZOL Diagnostica Vertrieb GmbH is your experienced and reliable partner for the distribution of high quality products and services within the life science sector.**

### **All your needs in one resource**

We provide over 16 million products from over 100 carefully selected suppliers worldwide

### **100% satisfaction guaranteed**

Our products are of the highest quality – if you are not satisfied, we will find a solution

### **30 years of experience**

We have been distributing research products to universities, research institutions and companies since 1989

### **We are scientists, too**

Our scientific support consists of Natural Science graduates with extensive research experience

### **Product search service**

You require a specific product – our scientific support team will find it for you

### **Global Sourcing**

Even if you need a product that our partner suppliers don't provide – we will still find it for you

### **Effortless purchasing system**

Uncomplicated ordering process – fast delivery – local contact – transparent pricing

### **[www.BIOZOL.de](http://www.BIOZOL.de)**

Our search engine provides filtered results from our entire product portfolio

BIOZOL is ISO 9001:2015 certified

Berti our mascot!

# ALL YOUR RESEARCH NEEDS IN ONE RESOURCE

## Antibodies

Our extensive range of high quality primary and secondary antibodies can easily be searched on the basis of species reactivity, application, clonality, host species, isotype and manufacturer using the selectable filters. In many cases antibody validation data can be found on the product datasheet, often generated in multiple applications, while details of the immunogen are frequently provided alongside information regarding the epitope where this has been mapped.

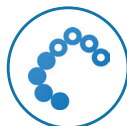

Our product portfolio also includes primary antibodies which have been directly conjugated to fluorophore or enzyme tags; these reagents are ideally suited to applications in which it is undesirable to incorporate a secondary antibody incubation step.

Popular techniques utilising the binding properties of antibodies include flow cytometry, immunohistochemistry, ELISA and western blotting.

## Assays and Kits

Our innovative assays and kits from the globe's top life science providers, save both time and money. Whatever your field of research BIOZOL has a kit or assay to meet your needs. Our comprehensive portfolio includes kits to amplify genomic DNA, ELISA and CLIA kits, western blot kits, immunohistochemistry staining kits, real-time PCR detection kits for pathogen testing and rapid test kits based on gold immunochromatography (GICA).

## Proteins and Peptides

Our range of high quality proteins and peptides can easily be searched using the selectable filters. Our product portfolio also includes proteins which have been directly conjugated to fluorophore or enzyme tags, further enhancing the utility of these essential reagents.

## Diagnostics

We offer a comprehensive range of human and veterinary diagnostic reagents, including antibodies, blocking peptides, proteins, cell culture reagents, biochemicals, assay kits including ELISA, and more.

## Cell Culture

Our range of cell culture reagents include: cell lines, growth media, cell dissociation reagents, wash buffers, cryo-preservation media, and more. We also provide a wide variety of products for the downstream assays in which cultured cells may be used.

## Biochemicals

Our range of biochemical products include: fluorophores, antibiotics, inhibitors, growth factors, vitamins, screening libraries, reference standards, impurities, phospholipids, activators, toxins and more. These can easily be searched using the selectable filters.

## MAIN RESEARCH AREAS:

- Apoptosis
- Cancer
- Cell Biology
- Genome Editing
- Epigenetics
- Immunology
- Infectious Diseases
- Inflammation
- Microbiology
- Neuroscience
- Proteomics
- Signal Transduction
- Stem Cell Research
- Virology

## APPLICATIONS:

- ELISA
- ELISPOT
- Flow Cytometry
- Functional Assays
- Immunocytochemistry
- Immunohistochemistry
- PCR
- Western Blot
- IVD

and many more

# “We are Scientists, too”

*Our friendly & experienced technical support team is always on hand to assist with any queries.*

**Ralf Bäuerle, Ph.D.**  
Managing Director
